

PROJECT SYNOPSIS:

1. Name / Title of the Project

➤ **Digital Staff Work Diary System**

2. Introduction and Objectives of Project

Introduction

The Digital Staff Work Diary System is a web-based application developed using Python Django to maintain daily staff work records in digital format. This system allows teachers to enter their daily academic activities, apply for leave, and submit self-appraisal reports online.

Traditional manual diary systems are time-consuming and difficult to manage. This project provides a centralized platform where staff activities are stored securely and can be monitored by administrators. The system improves transparency, reduces paperwork, and helps management evaluate staff performance effectively.

Objectives

To digitize staff daily work diary entries.

To provide online leave application facility.

To support self-appraisal submission.

To enable admin monitoring and reporting.

To reduce manual paperwork.

To store data securely in database.

To generate automatic reports.

3. Project Category

Web Application

4. Literature Survey

Most educational institutions still maintain staff records manually using registers or spreadsheets. These methods are prone to errors, data loss, and consume more time. Existing digital systems lack integrated features like work diary, leave management, and self-appraisal in one platform.

The proposed system overcomes these limitations by providing a unified web-based solution for staff diary management and performance tracking.

5. Modules of the Project

Admin Module

Admin Login

Dashboard

Staff Management

Academic Configuration

Leave Approval

View Self-Appraisal

Generate Reports

Teacher Module

Teacher Login

Work Diary Entry

Leave Application

Self-Appraisal Submission

View Reports

6. Tools / Platform

Frontend

HTML

CSS

JavaScript

Backend

Python

Django Framework

Database

SQLite / MySQL

Platform

Windows

Hardware Requirements

Processor: Intel i3 or above

RAM: Minimum 4GB

Hard Disk: 100GB

Internet Connection

Software Requirements

Windows OS

Python 3.x

Django

VS Code / PyCharm

Web Browser

7. Limitations

Requires internet connection.

Initial setup takes time.

Depends on server availability.

Needs basic technical knowledge for admin.

8. Project Team Members:

Shankargouda Biradar
